• Detects micro-leaks	✗	✓
• Automatic water shut-off protection	✗	✗

Newflo smart water meter

✓ PRECISION ULTRASONIC SENSING

Newflo uses advanced ultrasonic sensing technology to monitor water flow with high precision. This allows the system to detect micro-leaks, dripping taps, and abnormal usage before they become costly problems.

✓ COMMERCIAL-GRADE HARDWARE

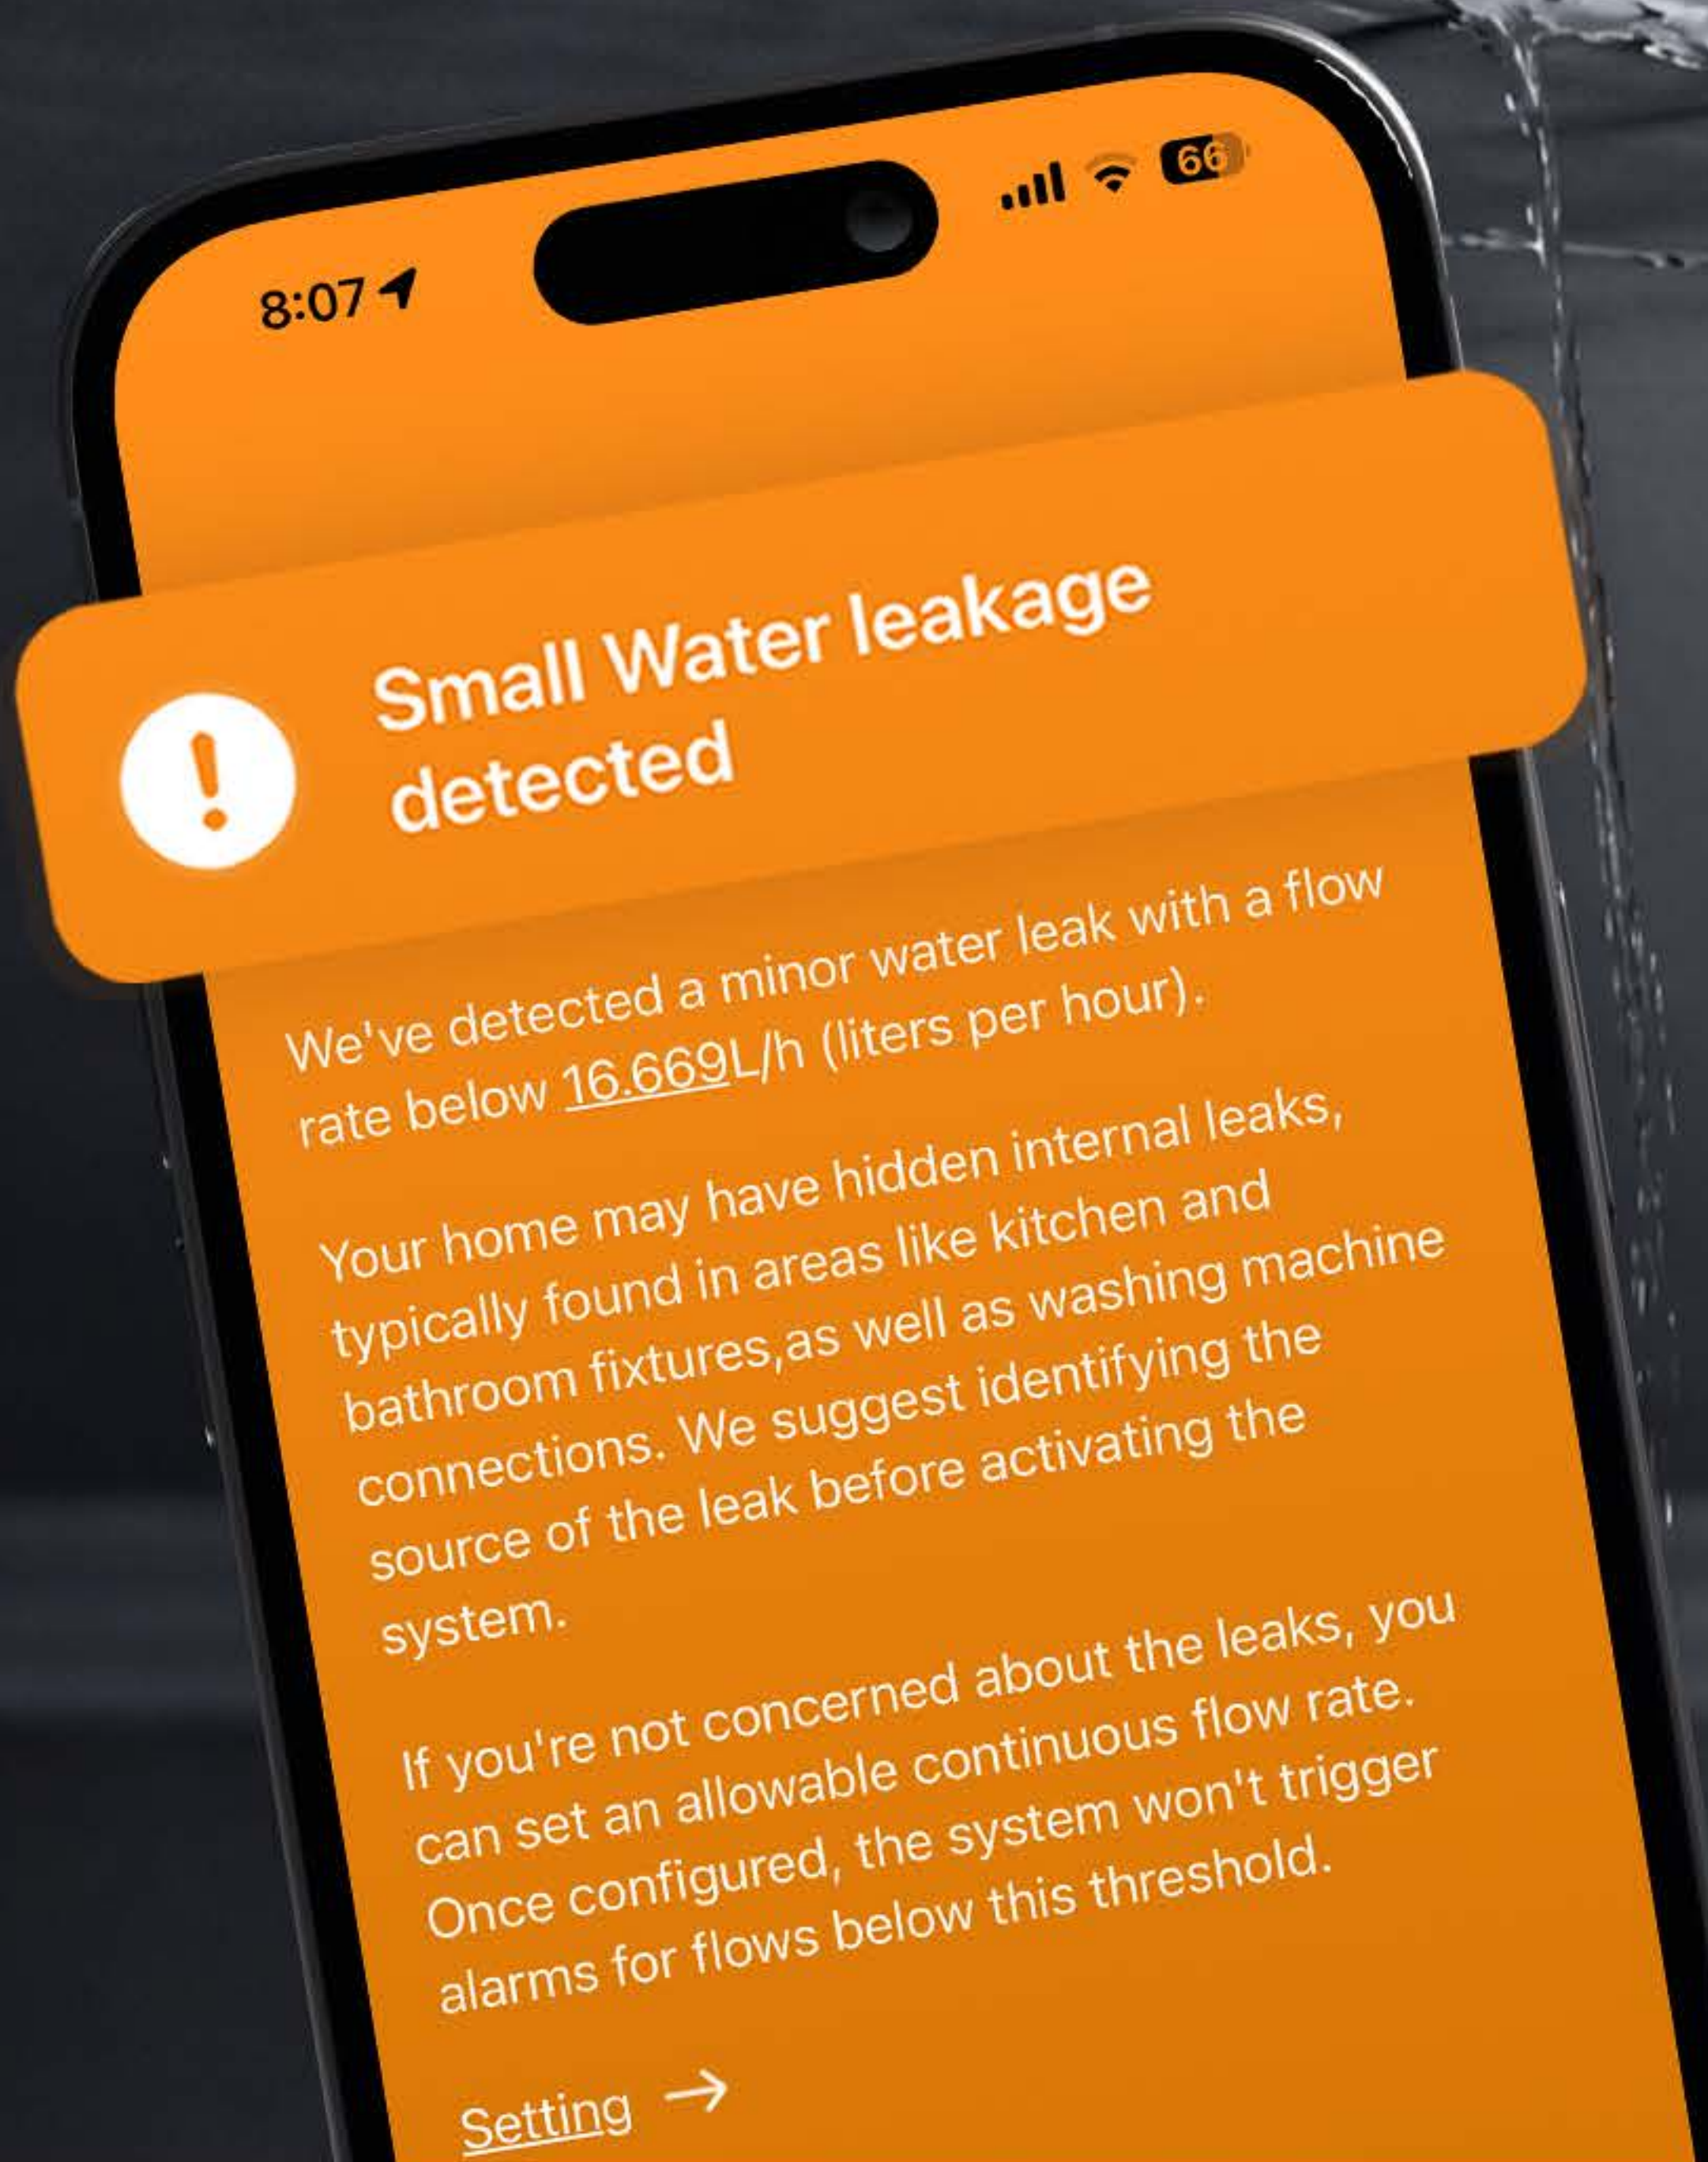

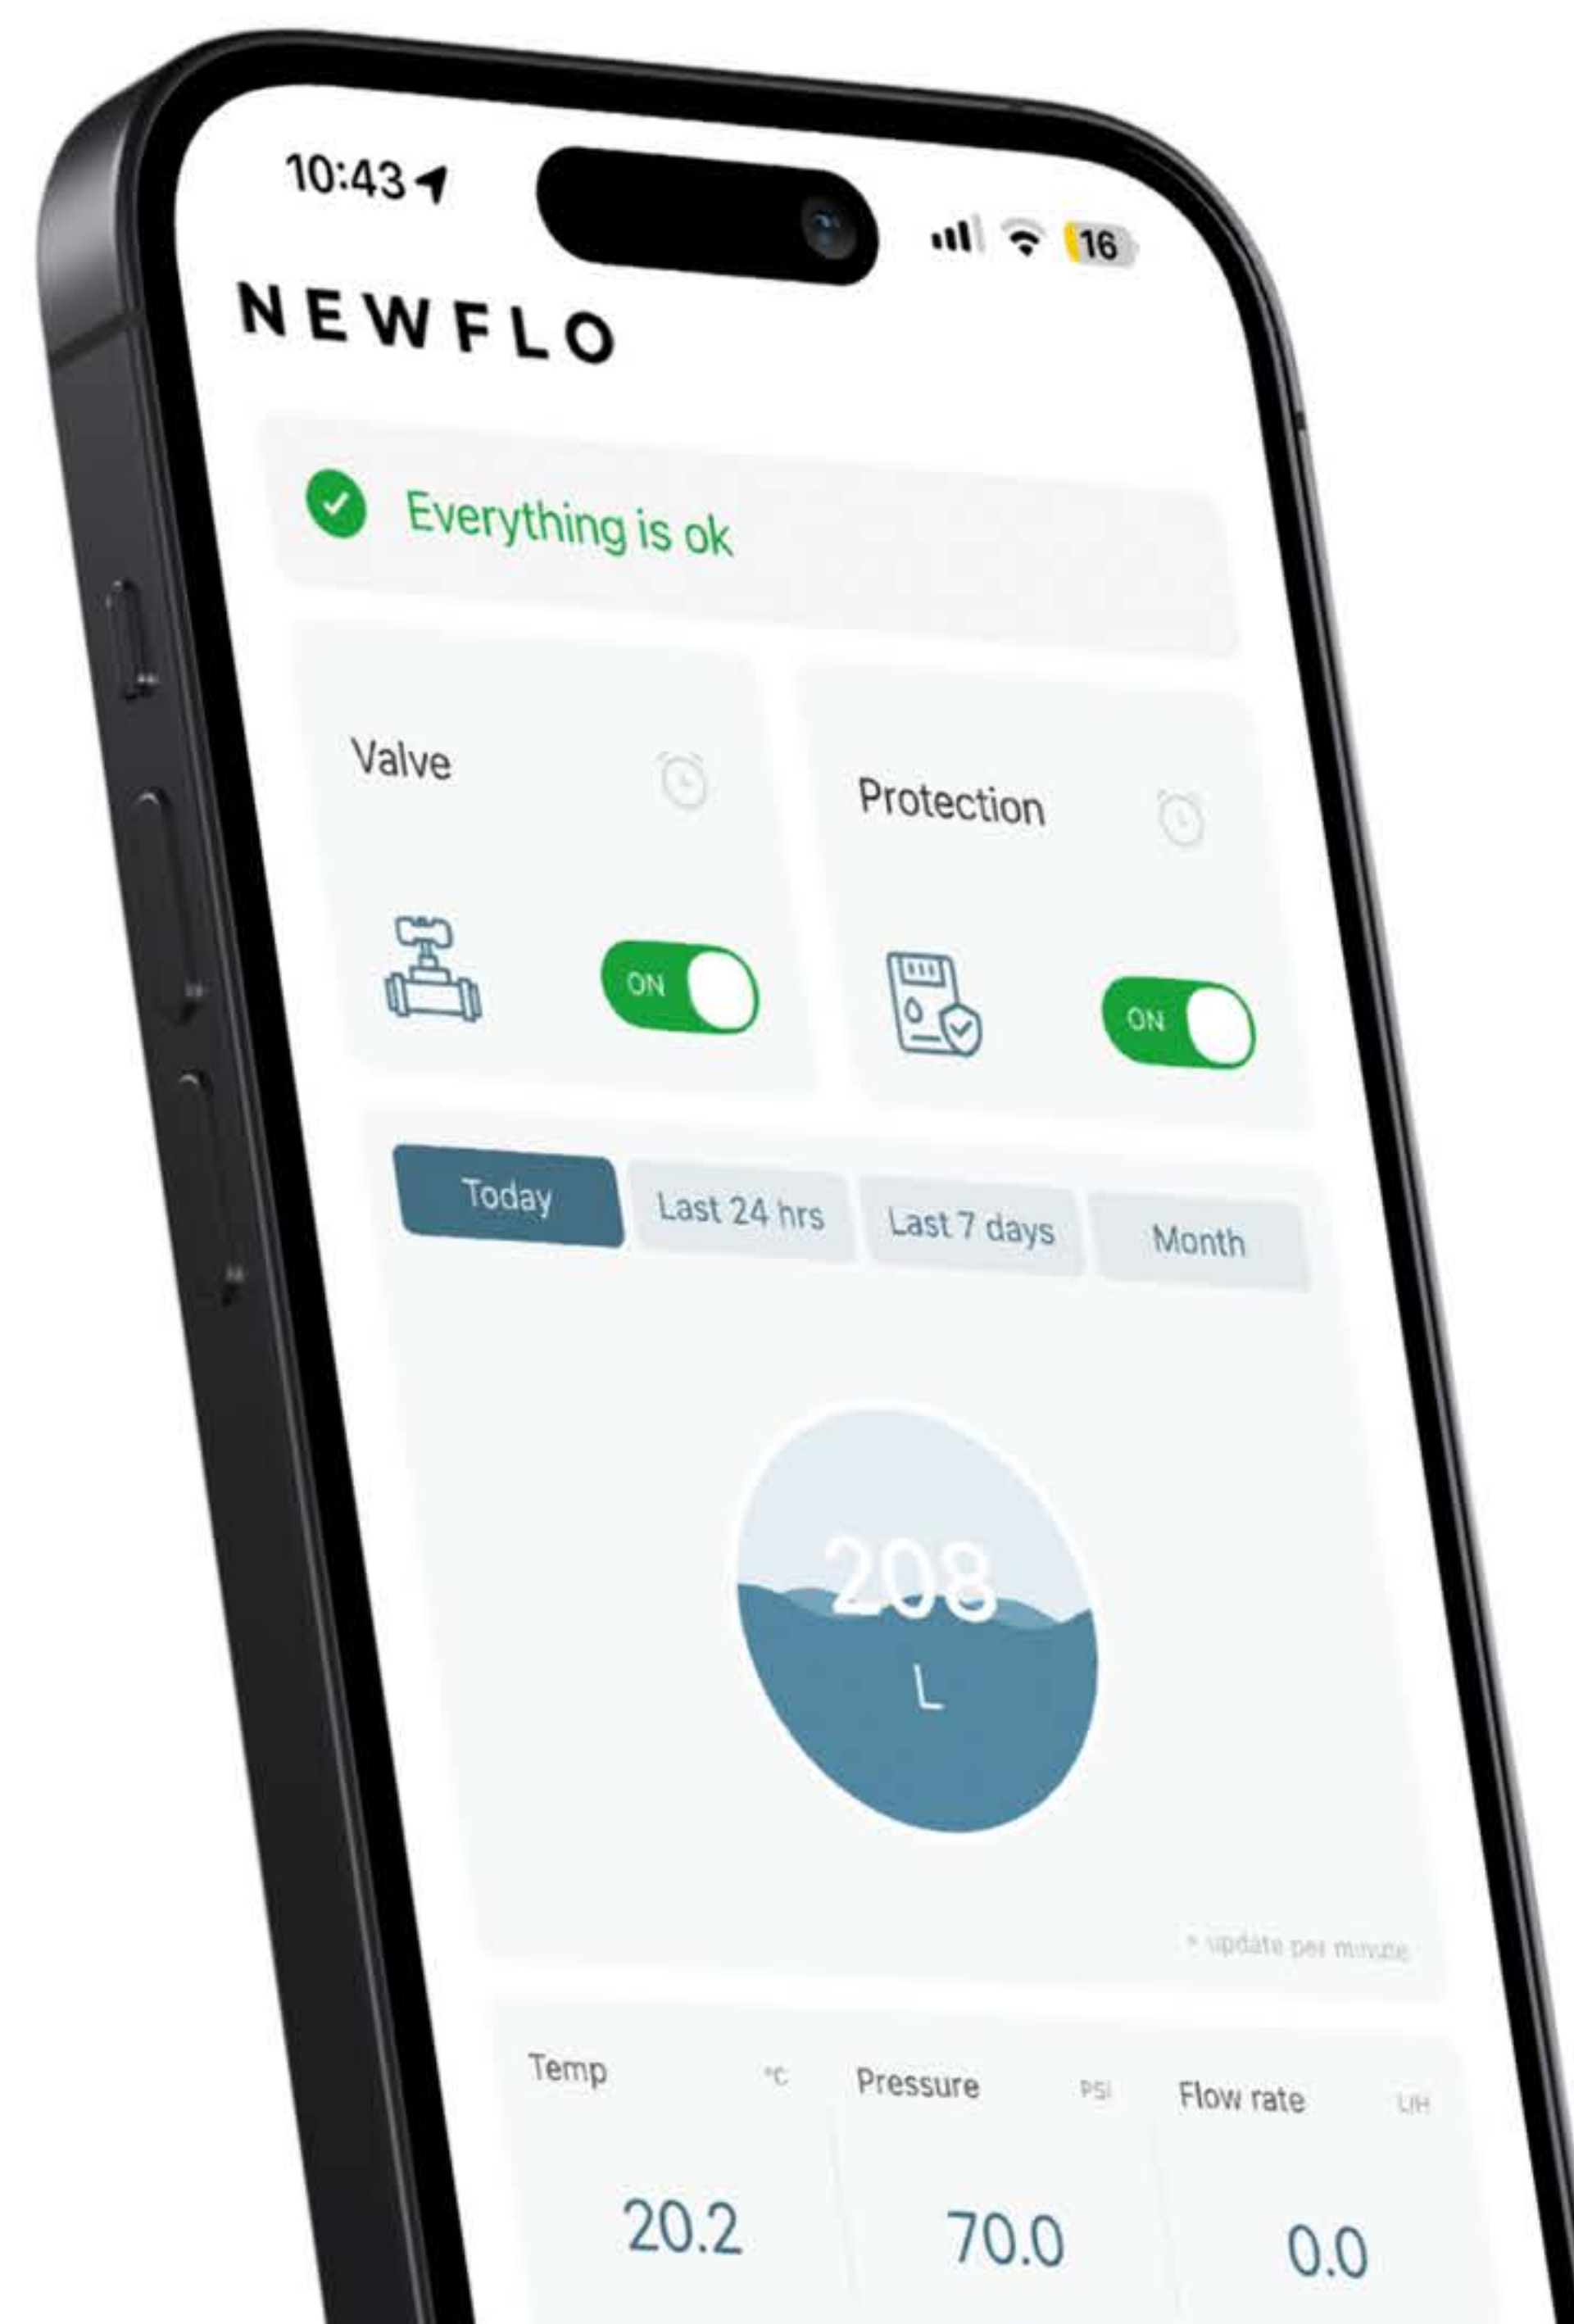

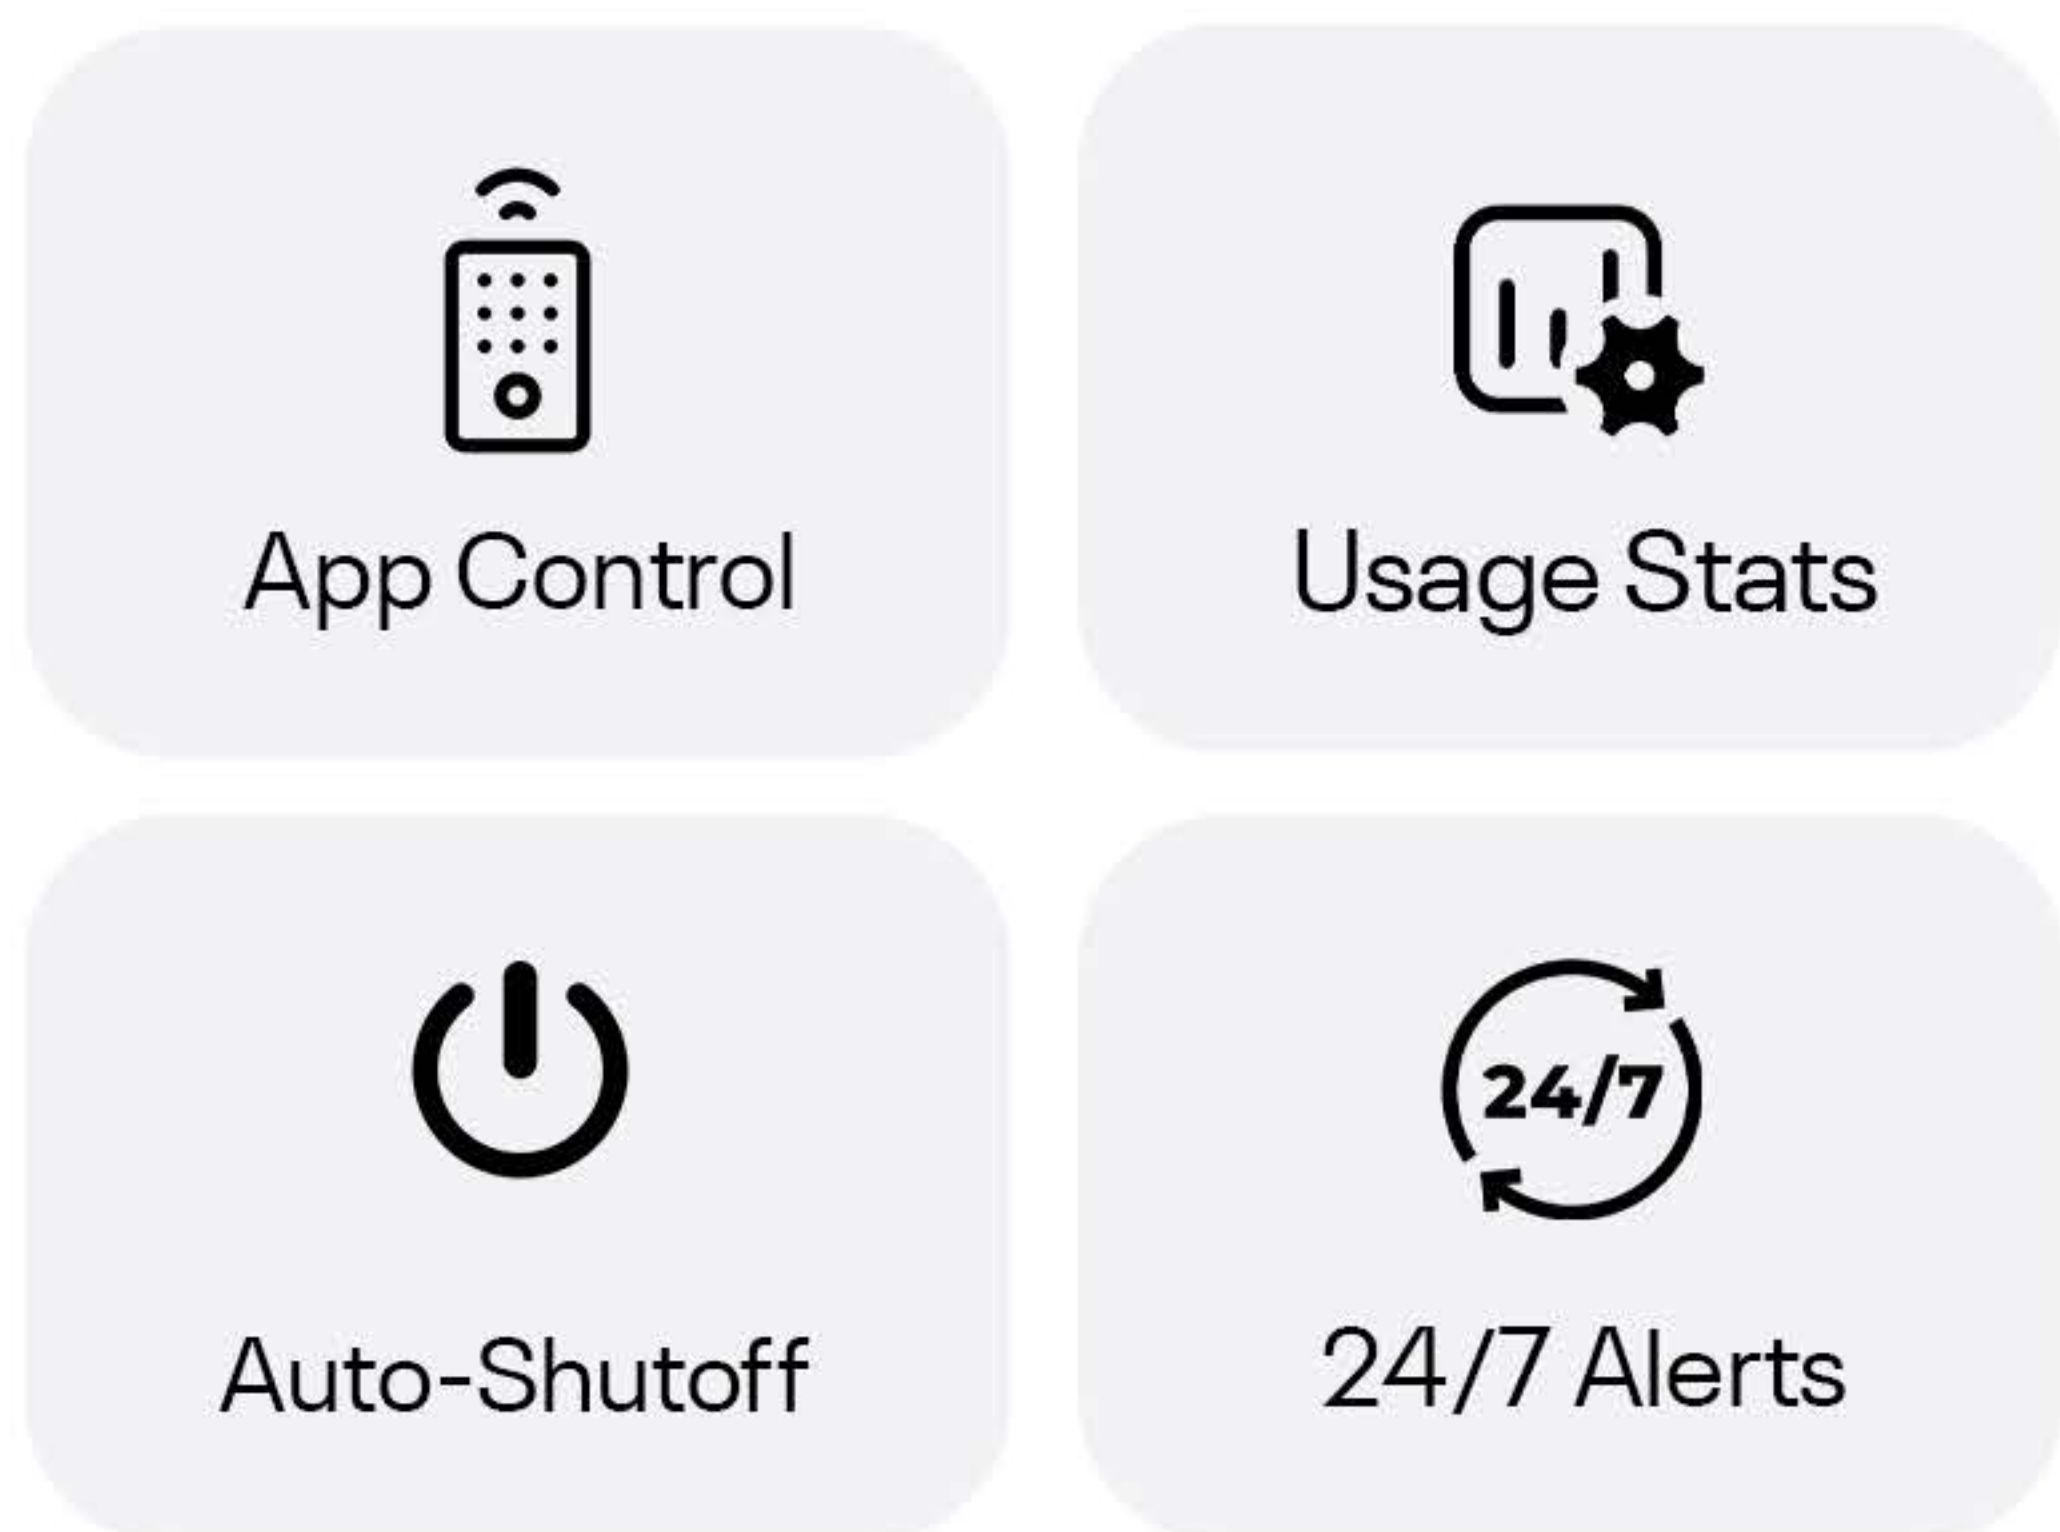

Built with high-quality brass fittings and durable internal components, the Newflo Smart meter is engineered for long-term reliability and performance in Australian homes.

✓ INTELLIGENT FLOW ANALYSIS

Smart monitoring technology analyses your home's water usage patterns. If unusual activity is detected, Newflo sends instant alerts and can automatically shut off the water to prevent water damage.

SMART WATER PROTECTION

Protect your home from water damage before it starts. Receive real-time alerts on your phone and manage your home's water system instantly through the Newflo mobile app.

ADVANCED LEAK DETECTION

Newflo continuously monitors water flow in your home using precision sensing technology. If a leak or abnormal usage is detected, the system sends alerts immediately and can automatically shut off the water supply.
